

## **Raising Concerns when in GP Placement**

### **Talk to your Clinical Supervisor/Educational Supervisor.**

Many concerns are due to miscommunication and/or are best dealt with locally so your Clinical Supervisor/GP Trainer is the person to approach.

### **At Regional teaching sessions.**

These happen regularly throughout your training. Small group work offers you plenty of opportunities to raise concerns.

### **Contact a Training Programme Director**

We have an open door policy and encourage you to talk to us at any time about any concerns you may have.

### **End of post feedback.**
